## BOOK RECOMMENDATIONS FOR PERSONAL DEVELOPMENT

As a Coach I spend a lot of time researching and reading the best Authors and Books available that help fast track my client's personal development and career growth. Here is my list of favorites that I benefited from and hopefully you will too -

- **Daniel Kahneman – Thinking, Fast and Slow** – Nobel Prize Winner – This book will make you think differently about thinking.
- **Joshua Foer – Moonwalking with Einstein** – Daniel Kahneman recommended this book. Exceptional for understanding how the brain works and a fascinating story on how he went from a journalist covering the World memory championships to being World Champion the following year.
- **Barbara Arrowsmith-Young – The Women who changed her Brain** – A really inspiring women who is re-defining how we support people with cognitive challenges.
- **Dalai Lama – The Art of Happiness** – Simply an uplifting book on what we all want.
- **Ed Catmull – Creativity Inc** – Amazing story of leadership and harnessing creative talent on the rise of Pixar.
- **Malcolm Gladwell – David and Goliath, Blink, Outliers** and basically anything he has ever written. An excellent writer and thinker.
- **Oliver Sacks – The Man who Mistook his Wife for a Hat** – You will have your mind opened on how the brain works.
- **Watkins – Harvard Business Review – The first 90 days** – a solid practical read for starting that new job/promotion.
- **Stig Brodersen and Preston Pysh - Warren Buffett Accounting** – As you progress in your career a financial aptitude and awareness will be required. This book comes from an investment stand point which I like as it helps the reader understand how you assess financial value.
- **John Whitmore – Coaching for Performance** – A great book for becoming better at Coaching your team.
- **Joshua Fletcher – Anxiety Practical About Panic** – I have family members and clients that experience anxiety. This helped my understanding of this crippling mental state.
- **Johann Hari – Lost Connections** – A must read to understand the rise of depression in modern society and the many areas that can support the journey back to mental wellness alongside medical interventions.
- **Martin Seligman – Learned Optimism – How to Change your mind and your Life** – This will give you a deeper understanding of psychology and your own personal traits and tendencies.
- **Jeff Olsen – The Slight Edge** – An amazing read on the power of discipline and consistency.

I'm here to fast track your (A-Ha moments that may take years to discover,) so that you can realize your true potential faster, reduce your chances of missed steps and live a more balanced and fulfilled life.

Should you be interested in connecting see details below and or reach out to me on LinkedIn, I would love to connect.
